SKY & TELESCOPE® Index to Volume 92

July–December 1996

Titles

Comet Hyakutake's Spectacular Performance, *Edwin L. Aguirre, 1:22*
Coming Attractions: A Solar-Eclipse Sneak Preview, *Fred Espenak, 2:48*
Galileo: An Image Gallery, *J. Kelly Beatty, 5:24*
Gamma-Ray Bursts: A Growing Enigma, *Joshua Roth, 3:32*
GONG: Probing the Sun's Hidden Heart, *James R. Kennedy, 4:20*
Life From Ancient Mars? *J. Kelly Beatty, 4:18*
Lunar Volcanism Controversy, The, *Ronald E. Doel, 4:26*
Modern View of Planetary Nebulae, A, *Sun Kwok, 1:38*
Namibian Astronomical Adventures, *Peter Riepe, Stefan Binnewies,* and *Harald Tomsik, 6:44*
Neptune at 150, *Jonathan I. Lunine, 3:38*
Optical Interferometry: Breaking the Barriers, *Daniel Fischer, 5:36*
Other Suns, Other Planets? *David C. Black, 2:20*
Our Nearest Celestial Neighbors, *Joshua Roth* and *Roger W. Sinnott, 4:32*
Rings of Revelation, *J. Kelly Beatty, 2:30*
S&T Test Report: Meade's 7-inch Maksutov-Cassegrains, *John Vogt, 5:48.*
S&T Test Report: SBIG's ST-7 CCD Camera, *Dennis di Cicco, 1:54*
S&T Test Report: Three 6-inch Dobsonian Reflectors, *Alan MacRobert, 6:56*
S&T Test Report: Two New 9¼-inch Schmidt-Cassegrains, *Dennis di Cicco, 4:38*
Sun-Climate Connection, The, *Sallie Baliunas* and *Willie Soon, 6:38*
Three Ships to Mars, *David F. Doody, 6:24*
Twenty Years of Seeing Double, *Harold A. McAlister, 5:28*
Unsolved Mysteries of the Sun — Part 1, *Kennth R. Lang, 2:38*
Unsolved Mysteries of the Sun — Part 2, *Kennth R. Lang, 3:24*
Visions of Mars, *Jon Lomberg, 6:30*
Was Hyakutake Really a Great Comet? *Stephen James O'Meara, 1:31*

Authors

Adams, C. Ron, Night Call, *5:6*
Aguirre, Edwin L., Comet Hyakutake's Spectacular Performance, *1:22*
How the Comet Was Discovered, *1:27*
Allard, Pierre, tele-tip, *5:86*
A. M., see *MacRobert, Alan M.*
Bagnall, Philip, Selling Stars, *4:6*
Baliunas, Sallie, book review, *5:59*
Baliunas, Sallie, and *Willie Soon,* The Sun-Climate Connection, *6:38*
Baruch, John E. F., Ready for Robotic Astronomy? *6:92*
Beatty, J. Kelly, Galileo: An Image Gallery, *5:24*
Life from Ancient Mars? *4:18*
Observer's Notebook, *6:107*
Rings of Revelation, *2:30*
Benton Jr., Julius L., Tracking Lunar Phenomena, *4:30*
Berendzen, Richard, book review, *6:63*
Berman, Bob, The Vibes of Space, *2:6*
Binnewies, Stefan, see *Riepe, Peter*
Black, David C., Other Suns, Other Planets? *2:20*
Blackwell, Kent, letter, *1:10*
Bortle, John E., Comet Digest, *1:110*
Comet Hale-Bopp Update, *4:67, 5:71, 6:75*
Legend of Smith Observatory, The, *6:98*
Both, Elöd, letter, *3:8*
Cook, William J., book review, *2:55*
Cutsforth, Norma, letter, *3:8*
Dantowitz, Ron, Keeping an Eyepiece on Satellites, *2:86*
di Cicco, Dennis, S&T Test Report: SBIG's ST-7 CCD Camera, *1:54*
S&T Test Report: Two New 9¼-inch Schmidt-Cassegrains, *4:38*
Dick, Steven J., book review, *2:54*
Dickinson, Terence, book review, *3:55*
Doel, Ronald E., The Lunar Volcanism Controversy, *4:26*
Doody, David F., Three Ships to Mars, *6:24*
Eichhorn, Günther, The Virtual Library, *4:81*
E. K., see *Karkoschka, Erich*
E. L. A., see *Aguirre, Edwin L.*
Espenak, Fred, Coming Attractions: A Solar-Eclipse Sneak Preview, *2:48*
Fischer, Daniel, Optical Interferometry: Breaking the Barriers, *5:36*
Fraknoi, Andrew, book review, *3:54*
letter, *6:8*
Freeman, Jay Reynolds, Reflections on a Great Comet, *1:8*
Fried, Bart, book review, *4:55*
F. S., see *Schaaf, Fred*
Gavin, Maurice, book review, *1:61*
Gerver, Joseph L., letter, *1:11*
Gibes, Frank, letter, *4:9*
Goldman, Stuart J., Astronomy Online, *1:94, 2:88, 3:88, 4:83, 5:91, 6:95*
Peek at Software Accuracy, A, *3:85*
Goldstein, Samuel J., letter, *4:8*
Hammel, Heidi B., book review, *3:52*
Harbour, David A., The Milk-Crate Mount, *5:83*
Harrington, Philip, Binocular Highlights, *1:68, 2:62, 3:62, 4:62, 5:66, 6:70*
Henry, Todd J., letter, *4:8*
Hester, J. Jeff, letter, *2:8*
Hunton, Donald E., letter, *4:9*
Hyatt, Kim A., tele-tip, *5:86*
J. E. M., see *Mosley, John E.*
Jepson, Jill, Searching in the Night, *6:6*
Junor, Bill, letter, *5:9*
Kaisler, Denise, letter, *2:9*
Karkoschka, Erich, Earth's Swollen Shadow, *3:98*
On the Moon, *3:100*
Kennedy, James R., GONG: Probing the Sun's Hidden Heart, *4:20*
Kennewell, John, When Asteroid Meets Earth, *5:90*
Khinvasara, Abhay, see *Smith, Timothy R.*
Kirshner, Robert P., book review, *3:53*
Krupp, E. C., Rambling Through the Skies, *1:66, 2:60, 3:60, 4:60, 5:64, 6:68*
Kurtz, Don, letter, *2:8*
Kwok, Sun, Modern View of Planetary Nebulae, A, *1:38*
Lang, Kenneth R., On the Scene at SOHO, *3:26*
Unsolved Mysteries of the Sun — Part 1, *2:38*
Unsolved Mysteries of the Sun — Part 2, *3:24*
Lay, Keith, tele-tip, *5:87*
Levy, David H., Star Trails, *1:101, 2:83, 3:94, 4:86, 5:96, 6:100*

Departments and Features

Amateur Astronomers —
Calendar of Events, *1:*102, *2:*84, *3:*96, *4:*87, *5:*97
Clear Skies — Guaranteed! *4:*84
Legend of Smith Observatory, The, *6:*98
Our Mobile Observatory Project, *2:*81
Park on the Moon, A, *3:*91
RASC Gathers in Edmonton, *5:*98
RTMC Snowstorm of '96, *4:*88
Schröter and Jupiter's Dark Spots, *1:*98
Star Parties Galore, *6:*102
Star Trails, *1:*101, *2:*83, *3:*94, *4:*86, *5:*96, *6:*100
World of Astronomy News, A, *5:*94
Astronomical Computing —
Arp-Inspired Adventure, An, *1:*92
Astronomy Online, *1:*94, *2:*88, *3:*88, *4:*83, *5:*91, *6:*95
Keeping an Eyepiece on Satellites, *2:*86
Peek at Software Accuracy, A, *3:*85
Ready for Robotic Astronomy? *6:*92
Virtual Library, The, *4:*81
When Asteroid Meets Earth, *5:*90
Backyard Astronomy —
Dissecting Light Pollution, *5:*44
Serpens-Virgo Star-Hop, A, *1:*46
Spectral Types of Stars, The, *4:*48
Books & Beyond —
Alvan Clark & Sons: Artists in Optics, Deborah Jean Warner and Robert B. Ariail, *4:*55
Beyond Planet Earth, Discovery Communications, Inc., *1:*62
Binoculars, Opera Glasses, and Field Glasses, *2:*55
Briefly Noted, *1:*63, *2:*57, *4:*57, *5:*60, *6:*66
Choosing, Using, and Repairing Binoculars, Jay W. Seyfried, *2:*55
Cosmic Voyage, Smithsonian Institution and the Motorola Foundation, *6:*62
Ever-Changing Sky, The: A Guide to the Celestial Sphere, James B. Kaler, *4:*54
GalaxyGuide, Parallax MultiMedia, Inc., *5:*58
Gems of Hubble, Jacqueline Mitton and Stephen P. Maran, *6:*63
Gravity's Fatal Attraction: Black Holes in the Universe, Mitchell Begelman and Martin Rees, *5:*56
Hubble: A New Window to the Universe, Daniel Fischer and Hilmar Duerbeck, *6:*63
Invisible Universe, Fiorella Terenzi, *2:*56
Longitude, Dava Sobel, *1:*60
Mapping of the Heavens, The, Peter Whitfield, *1:*61
Meridian, Claude Duplessis, *4:*56
More for Black Hole Lovers, *5:*57
Planetary Astronomy From the Renaissance to the Rise of Astrophysics, Part B: The Eighteenth and Nineteenth Centuries, René Taton and Curtis Wilson, *2:*54
Software Update, *2:*57
Stranded Astronomer's Library, The, *3:*52
Sun, Earth and Sky, Kenneth R. Lang, *5:*59
Telescopes and Techniques, Christopher R. Kitchin, *1:*61
Twentieth Century Physics, Laurie M. Brown, Abraham Pais, Sir Brian Pippard, eds. *5:*57
Visions of Mars, Planetary Society, *6:*65
Celestial Calendar —
Calendar Notes, *1:*79, *2:*73, *3:*76, *4:*72, *5:*77, *6:*79
Ceres Over Antares, *1:*77
Conjunctions During Eclipses, *3:*69
Discovery of the Perseid Meteors, The, *2:*68
Earth-Crossing Asteroid, An, *4:*68
Fine Perseid Prospects for August 11–12, *2:*70
Hale-Bopp Update, *3:*72
Juno's Perihelic Opposition, *4:*69
Jupiter's Satellites, *1:*78, *2:*72, *3:*74, *4:*70, *5:*75, *6:*78
Leonids' Last Hurrah? The, *5:*74
Leonids, The: Waiting and Watching, *5:*72
Measuring Longitude, Columbus Style, *3:*70
Partial Solar Eclipse, A, *4:*71
Return of Toutatis, The, *6:*76

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books & Beyond is ordinarily indexed only under the Departments and Features section.

Amateur activities: Astrofest, *6:*103; Lumezzane, Italy, astronomy center, *5:*94; astrophotography in Namibia, *6:*44; Clear Skies traveling planetarium program, *4:*84; comet hunting, *1:*10; crater timing during lunar eclipses, *3:*101; fighting light pollution, *5:*44; General Assembly of the Royal Astronomical Society of Canada, *5:*98; lunar transient phenomena, *4:*30; Mars Watch program to support NASA mission, *6:*26; Mobile Observatory project, *2:*81; Nebraska Star Party, *6:*103; renovating old observatory, *3:*6; Riverside Telescope Makers Conference, *4:*88; speckle interferometry, *5:*34; Starfest, *6:*102; Stellafane, *6:*102; young Moon sightings, *6:*104

Art: impressions of Mars, *6:*30

Asteroids (minor planets): 341 California, *1:*79; 1 Ceres, *1:*77; 972 Cohina, *6:*79; comet with asteroid-like orbit, *5:*10; Earth-crossing, *2:*14; *4:*68; *6:*76; 481 Emita, *3:*76; 433 Eros, *2:*16; estimating impact-crater sizes, *5:*90; 476 Hedwig, *3:*76; 3 Juno, *4:*69; 1982 TA (4197), *4:*68; 1996 JA_1, *2:*14; 1996 PW, *5:*10; Pluto and classification, *1:*11; *5:*8; 203 Pompeja, *1:*79; 4179 Toutatis, *6:*76

Astrometry: and extrasolar planets, *2:*11, 22; first parallaxes from Hipparcos satellite, *4:*16

Astronomical constants: Hubble parameter, *1:*12; gravitational, *6:*16

Astronomy and society: concepts of surface of Mars, *6:*30; Jewish religious observations, *3:*94; misleading reporting of discoveries in mass media, *2:*9

Atlases and catalogs: Arp's *Atlas of Peculiar Galaxies, 1:*92; Internet-accessible star charts, *5:*91; professional catalogs online, *4:*81

Atmospheric phenomena: aerosol cloud visible in southern United States, *1:*10; chemical-release experiments, *4:*9; parhelic circle, *2:*67

Bioastronomy: fossilized life in meteorite from Mars? *4:*18; *5:*11; SETI from Australia comes up empty, *5:*15

Black holes: see ***Collapsed objects***

Calendars: young Moon sightings and Islamic, *6:*106

Celestial mechanics: geometry of the Harvest Moon, *3:*60

Chemistry: acetic acid (vinegar) in interstellar space, *3:*17; fluorine produced by giant stars, *6:*16; metallic hydrogen synthesized, *1:*18; remnants of Comet Shoemaker-Levy 9 in Jupiter's atmosphere, *6:*14

Collapsed objects: age of Vela pulsar, *6:*12; Crab pulsar, *2:*10; evidence for binary black holes, *4:*15; lowest-mass white dwarf, *5:*16; merging neutron stars and gamma-ray bursts, *3:*32; planets around pulsar, *2:*8, 24; pulsar with most circular orbit known, *2:*16; starquakes on neutron stars, *5:*14; supermassive in M87, *5:*9; testing for Planet X by timing pulsars, *1:*18

Comets: around other stars, *1:*15; asteroid 1996 PW with cometlike orbit, *5:*10; chemical remnants of Comet Shoemaker-Levy 9 in Jupiter's atmosphere, *6:*14; Elst-Pizarro (P/1996 N2), *5:*10; Great Comets, *1:*31; Hale-Bopp (C/1995 O1), *3:*72; *4:*67; *5:*71; *6:*75, 108; Hyakutake (C/1996 B2), *1:*8, 22, 31; *3:*67; *4:*8, 9, 86; *6:*12; IRAS-Araki-Alcock, *1:*32; 22P/Kopff, *1:*110; *6:*108; Shoemaker-Levy 9, *6:*14; Tabur (C/1996 Q1), *5:*10; taking time to hunt for, *1:*10; West, *1:*32

Computing: accuracy of commercial astronomical software, *3:*85; *4:*11; assembling database for Arp catalog, *1:*92; estimating impact-crater sizes, *5:*90; tracking Earth-orbiting spacecraft, *2:*86, 88

Conjunctions: during lunar eclipses, *3:*69; Saturn, Regulus, and lunar eclipse on February 21, 2008, *3:*69

Constellation study: arrows in the sky, *4:*60; Cassiopeia, *2:*60; Corona Borealis, *2:*60; Hyades, *5:*64; queens and crown in the stars, *2:*60; Sagitta, *4:*60

Cosmic background radiation: detailed maps of, *3:*14

Cosmology: Hubble parameter, *1:*12; evidence for early starbursts, *4:*10; galaxy older than universe? *3:*11

Dark matter: inhibiting tidal-tail formation of galaxies, *3:*15; planetary nebulae as tracer of, *1:*43

Eclipses:

Lunar: December 9, 1992, total, *3:*101; November 29, 1993, total, *3:*101; April 3–4, 1996, total, *1:*112; *3:*101, 102; September 26–27, 1996, total, *3:*68; *6:*109; February 21, 2008, total, with conjunction of Saturn and Regulus, *3:*69; conjunctions during, *3:*69; crater-timings, *3:*101; enlargement of Earth's umbra, *3:*98

Solar: October 12, 1996, partial, *4:*71; March 9, 1997, total, *2:*49; February 26, 1998, total, *2:*49; August 11, 1999, total *2:*51; effect on tropospheric temperature, *1:*11

Education: Clear Skies traveling planetarium program, *4:*84; misleading reporting of discoveries in mass media, *2:*9; Mobile Observatory project, *2:*81; network for college astronomy instructors, *6:*8; solar museum in Bad Oeynhausen, Germany, *5:*95

Galaxies: classification of elliptical, *6:*14; highest redshift, *3:*10; older than universe? *3:*11; protogalactic objects? *5:*11; revising Hubble sequence, *6:*14; youngest, *3:*10

Active: Markarian 501, *1:*18

Interacting: Arp 295, *2:*12; gas distribution in mergers, *2:*12; NGC 3921, *2:*12; NGC 4676, *2:*12; NGC 7252, *2:*12; tidal-tail formation, *3:*15

Local Group (see also *Milky Way* and ***Magellanic Clouds***): globular clusters in M33 younger than Milky Way's, *4:*14

Milky Way: high-velocity clouds and, *5:*15

"Normal": NGC 2655, *5:*13; NGC 5746, *1:*49; NGC 5750, *1:*49; NGC 5813, *1:*49; NGC 5831, *1:*48; NGC 5838, *1:*48; NGC 5846, *1:*48; NGC 5850, *1:*48; NGC 5854, *1:*48; NGC 6946, *5:*102; streamers from NGC 55, *5:*14

Superclusters of: Las Campanas redshift survey map, *1:*15

Gamma-ray astronomy: gamma-ray bursts, *3:*32; soft gamma-ray repeaters related to neutron-star crustal changes, *5:*14; very-high-energy photons from Markarian 501, *1:*18

Gravitation: microlensing events suggest numerous planets, *5:*12; new Einstein ring, *1:*16; value of gravitational constant refined, *6:*16

History: claim of active volcanism on Moon in 1958, *4:*26; discovery of Neptune, *3:*42; discovery of Perseid meteor shower, *2:*68; *5:*8; 450th anniversary of Tycho Brahe's birth, *6:*68; using eclipses to measure longitude, *3:*70

Hubble Space Telescope: Eta Carinae, *4:*13; determining Hubble parameter, *1:*12; globulars in M33, *4:*14; Hubble Deep Field, *3:*10; M31's brightest globular, *2:*15; NGC 604, *5:*20; 100,000th image taken, *4:*11; protogalactic objects? *5:*11; ripples in Crab Nebula, *2:*10

Imaging:

Astrophotography: in Namibia, Africa, *6:*44

Charge-coupled devices (CCDs): creating true-color views, *2:*8; SBIG ST-7 camera, *1:*54; tracking Earth-orbiting spacecraft, *2:*87

Infrared astronomy: first results from Infrared Space Observatory, *4:*12; image of M27, *3:*16; volcanic eruption on Io, *2:*15; water emission from W Hydrae, *4:*12

Interferometry: optical, *1:*15; *5:*36; searching for extrasolar planets, *2:*25; speckle studies of binary stars, *5:*28

Interstellar matter: acetic acid (vinegar) found, *3:*17; hyperbolic dust particles, *2:*13; polycyclic aromatic hydrocarbons, *2:*12; silicates in dust, *3:*17

Light pollution: glare, *5:*44; guidelines for good lighting, *5:*44; and length of Comet Hyakutake's tail, *3:*67; skyglow, *5:*44

Magellanic Clouds: bar and spiral structure of Large Cloud, *3:*15; colliding supernove remnants, *6:*13; SETI investigation of Small Cloud comes up empty, *5:*15; star formation in Large Cloud, *3:*15

Meteorites: ALH 84001, *1:*14; *4:*18; *5:*11; fossilized life from Mars? *4:*18; *5:*11; from Mars, *1:*14; *4:*18; *5:*11; micrometeorites from South Pole water well, *3:*16

Meteors: discovery of Perseid shower, *2:*68; *5:*8; Geminid shower, *6:*79; Leonid shower, *5:*72, 74; originating from outside the solar system, *2:*13; Orionid shower, *4:*72; Perseids, *2:*16, 68; *5:*8; *6:*107; Perseids being freed from Comet Swift-Tuttle, *2:*16; possible shower radiant at Aries-Triangulum border, *4:*95

Moon: atmosphere of, *1:*17; claim of active volcanism on, *4:*26; craters Heraclitus, Licetus, and Cuvier, *3:*91; craters Hesiodus and Pitatus, *1:*74; emission spectrum of crater Alphonsus, *4:*27; Harvest Moon, *3:*60; and Islamic calendar, *6:*106; lunar transient phenomena, *4:*30; sunlight ray in crater Hesiodus, *1:*74; *4:*94; *5:*8; young Moon sightings, *6:*104

Nebulae:

Bright: Eta Carinae, *4:*13; IC 10, *5:*105; IC 59, *5:*105; IC 63, *5:*105; IC 1287, *1:*108; IC 1396, *5:*103; IC 2944, *3:*20; M20 (Trifid), *6:*20; NGC 604, *5:*20; NGC 7023, *5:*103; NGC 7635 (Bubble), *5:*103

Dark: Barnard 103, *1:*107; Barnard 114–118, *1:*107; Bok globules, *3:*20

Planetary: Egg, *1:*42; IC 1295, *1:*108; K3-62, *1:*40; K4-8, *1:*108; M1-92 (Minkowski's Footprint), *6:*13; M27 (Dumbbell), *1:*38; *3:*16; in M101, *1:*43; MyCn18 (Etched Hourglass), *1:*40; NGC 40, *5:*103; NGC 1501, *5:*106; NGC 6537, *5:*13; NGC 7008, *5:*103; NGC 7027, *1:*41; origin and evolution of, *1:*38; protoplanetary, *1:*42; *6:*13; Shapley 1, *1:*39; as standard candles, *1:*43; as tracers of dark matter, *1:*43

Neutrino astronomy: new detectors, *2:*39; Sun study, *2:*39

Neutron stars: see ***Collapsed objects***

Novae: possible light echoes from Nova Cygni 1992, *4:*10

Observatories:

Amateur and public: Grainger Solar Telescope, *5:*95; Mobile Observatory project, *2:*81; renovating old dome, *3:*6; Serafino Zani Astronomical, *5:*94; William Smith, *6:*98

Professional: Arecibo, *2:*11; Berkeley-Illinois-Maryland Association (BIMA) Array, *4:*14; Cambridge Optical Aperture Synthesis Telescope (COAST), *5:*36; Center for High Angular Resolution Astronomy (CHARA), *5:*33; Global Oscillation Network Group (GONG), *4:*20; Iowa Robotic, *6:*95; Keck, *1:*13; Kitt Peak, *1:*12; Mount Graham, *6:*8; Mount Wilson, *3:*14; Pic du Midi, *4:*13; Sudbury Neutrino, *2:*39; Superkamiokande, *2:*39; Uraniborg, *6:*68

Observing techniques: drawing Jupiter, *4:*92; finding and photographing Pluto, *4:*96; preventing dew, *1:*110; rubber eyecups on eyepieces to protect glasses, *4:*9; using finder cross hairs to center object in field, *5:*86; young Moon sightings, *6:*104

Occultations: January 27, 1996, of Venus by Moon, *1:*113; March 6, 1996, of Nu^2 Sagittarii by Jupiter, *1:*109

Online databases and communications (see also ***Computing***): Arp catalog, *1:*92; Astrophysics Data System, *4:*81; Internet-accessible star charts, *5:*91; personal astronomical WWW home pages, *1:*94; professional papers and data, *4:*81; robotic telescopes acessible via the Internet, *6:*92, 95; tracking Earth-orbiting spacecraft, *2:*88

Optics: adaptive system on 100-inch Hooker telescope, *3:*14; coma correction, *6:*83; refiguring mirror with heat, *1:*10

People: Adams, J. C., *3:*42; Ambartsumian, V. A., *5:*15; Arago, F., *2:*70; Brahe, T., *6:*68; Brandes, H. W., *2:*69; Brooks, W. R., *6:*98; Challis, J., *3:*42; Columbus, C., *3:*70; Fraknoi, A., *5:*96; Galle, J., *3:*43; Herrick, E. C., *2:*68; *5:*8; Hyakutake, Y., *1:*27; Kennedy, A., *4:*84; Kuiper, G. A., *4:*26; Kozyrev, N. A., *4:*26; Lang, J., *4:*84; Le Verrier, U. J. J., *3:*42; Locke, J., *2:*69; long-time *Sky & Telescope* subscribers, *3:*8; Lovering, J., *2:*70; Mulvey, J. V., *6:*99; Olmsted, D., *2:*68; Puckett, T., *6:*100; Quetelet, A., *2:*70; Schröter, J. H., *1:*98; Shapley-Matthews, M., *2:*83; Silliman, B., *2:*68; Swift, L., *6:*98

Planetariums: Clear Skies traveling planetarium program, *4:*84; closed-captioning system in Boston's Charles Hayden, *5:*95

Planets and their satellites:

Earth (see also ***Moon***): Chesapeake Bay crater, *1:*17; climate and the Sun, *6:*38; rotation rate of core, *4:*10; Tom's Canyon crater, *1:*17; tropospheric temperature affected by eclipses, *1:*11

Extrasolar: *2:*20; around pulsar, *2:*8; Bode's Law and pulsar planets, *2:*8; Tau Boötis A, *4:*15; Rho^1 Cancri, *1:*13; detection thresholds, *2:*26; CM Draconis, *3:*10; evidence for from microlensing, *5:*12; table of candidates, *2:*24; two around Lalande 21185? *2:*11

Jupiter: chemical remnants of Comet Shoemaker-Levy 9, *6:*14; dark spots seen by Johann Schröter in 1700s? *1:*99; frequency of dark spots, *1:*98; Galileo spacecraft imagery, *3:*11; *5:*24; Ganymede, *3:*11; *5:*24; Io, *2:*15; *5:*25; large volcanic eruption on Io, *2:*15; magnetic field of Io, *2:*10; ring dust short-lived, *3:*17

Mars: artists' and authors' impressions of, *6:*30; compendium of dust-storm observations, *6:*8; fossilized life from? *4:*18; *5:*11; meteorites from, *1:*14; *4:*18; *5:*11; spacecraft to explore in 1997, *6:*24

Neptune: atmosphere, *3:*38; current understanding of, *3:*38; discovery of, *3:*42; internal structure, *3:*40; mythology of, *1:*66; nomenclature of satellites, *1:*66; rings, *3:*41; satellites, *3:*42

Pluto: finding and photographing, *4:*96; as planet or asteroid? *1:*11; *5:*8

Saturn: Atlas, *2:*30; E, G rings, *2:*33; F ring, *2:*31; 1995–96 ring-plane crossings, *2:*30; Prometheus, *2:*30

Pulsars: see ***Collapsed objects***

Quasars: binary black holes in 3C 390.3 and OJ 287, *4:*15; molecular gas in, *4:*10

Radar astronomy: extrasolar meteors, *2:*13; minor planet 4179 Toutatis, *6:*76

Radio astronomy: image of young binary star, *2:*14; 21-centimeter Milky Way map, *2:*75; upgrade for Arecibo telescope, *2:*11; using satellite-TV dish, *2:*75

Science policy: funding crunch at Kitt Peak National Observatory, *1:*12; plans to finance Pic du Midi Observatory with tourism, *4:*13

Solar System: classification of objects in, *1:*11; metallic hydrogen synthesized, *1:*18; solar apex, *3:*64; testing for Planet X by timing pulsars, *1:*18

Spacecraft (see also ***Hubble Space Telescope***): BeppoSAX, *2:*16; *4:*16; Cassini/Huygens, *1:*18; Cerise, *5:*16; Cluster, *3:*18; *4:*16; COBRAS/SAMBA, *2:*16; Far Ultraviolet Spectroscopic Explorer, *1:*18; Fast Auroral Snapshot Explorer, *5:*16; Galileo, *2:*10; *3:*11, 18; *5:*24; Gravity Probe B, *4:*16; Hipparcos, *4:*16; Imager for Magnetopause-to-Aurora Global Exploration (IMAGE), *2:*16; Infrared Space Observatory, *3:*18; *4:*12; Mars 96, *6:*24; Mars Global Surveyor, *5:*16; *6:*24; Mars Pathfinder, *5:*16; *6:*24; Microwave Anisotropy Probe, *2:*16; Mir, *2:*86; *5:*16; Rossi X-ray Timing Explorer, *1:*18; Sojourner, *6:*26; Solar and Heliospheric Observatory (SOHO), *1:*18; *2:*39; *3:*26; *6:*12; Space Infrared Telescope Facility, *4:*16; Space Shuttle *Atlantis,* *2:*86; Tethered Satellite System, *1:*109; *3:*18; VLBI Space Observatory Program, *3:*18; X-33, *4:*16

Space debris: French satellite damaged in collision, *5:*16

Star clusters:

Associations: Perseus OB3, *6:*70

Globular: around Andromeda Galaxy, *2:*15; M4, *1:*68; M5, *1:*46; M10, *2:*62; M12, *2:*62; M19, *1:*68; M62, *1:*68; M71, *3:*62; M80, *1:*68; Mayall II (G1), *2:*15; NGC 6712, *1:*108; not bounded to galaxies, *3:*17

Open: M11, *1:*109; M26, *1:*109; M39, *4:*62; M52, *5:*104; NGC 457, *5:*106; NGC 1528, *5:*107; *6:*70; NGC 1545, *6:*70; NGC 6649, *1:*108; NGC 6664, *1:*108; NGC 6939, *5:*102; NGC 7209, *4:*62; NGC 7243, *4:*62; NGC 7789, *5:*104; Stock 2, *5:*106; Trumpler 34, *1:*108; Trumpler 35, *1:*109

Stars: binary star being born, *2:*14; comets around, *1:*15; coolest isolated dwarf, *6:*16; evidence for planets around, *1:*13; *2:*8, 11, 20; *3:*10; *4:*15; fluorine produced by giant stars, *6:*16; Hertzsprung-Russell diagram, *4:*50; lowest-mass white dwarf, *5:*16; luminosity classes, *4:*50; magnetic cycles in Sun-like, *6:*40; nearest (within 13 light-years of Sun), *4:*32; origin of name "brown dwarf," *4:*8; protoplanetary disks, *6:*15; spectral classes, *4:*48; synthetic spectra, *4:*49

Double and multiple: Capella, *1:*15; Xi Cephei A, *5:*29; Chi Draconis, *5:*29; Ho 311, *5:*33; HR 266, *5:*31; HR 6697, *5:*30; 12 Persei, *5:*29; Gamma Persei, *5:*32; resolving spectroscopic binaries, *5:*29; 5 Serpentis, *1:*46; speckle interferometry studies of, *5:*29; Struve 1885, *1:*49; Struve 2597, *5:*33; 51 Tauri, *5:*29; M Virginis, *1:*49

Individual: Rho[1] Cancri, *1:*13; *2:*24; Eta Carinae, *2:*13; CM Draconis, *3:*10; Gliese 229, *2:*24; HD 114762, *2:*24; HD 168625, *5:*12; W Hydrae, *4:*12; Lalande 21185, *2:*11, 24; 51 Pegasi, *2:*24; Beta Pictoris, *1:*15; Alpha Serpentis, *1:*46; Psi Serpentis, *1:*46; 47 Ursae Majoris, *2:*24; 70 Virginis, *2:*24; 110 Virginis, *1:*48

Variable: Algol, *5:*66; Betelgeuse, *5:*14; luminous blue variables, *5:*12; Rho Persei, *5:*66; Z Serpentis, *1:*48

Sun: corona, *2:*41; first results from GONG, *4:*20; helioseismology, *3:*24; *4:*20; internal composition, *3:*24; origin of solar activity, *3:*24; relation to Earth's climate, *6:*38; rotation, *3:*27; solar magnetic cycle, *6:*39; solar neutrino problem, *2:*39; solar wind, *2:*42

Supernovae: Cassiopeia A, *5:*15; colliding remnants in Large Magellanic Cloud, *6:*13; light echoes of SN 1987A, *1:*14; X-ray image of SN 1006 remnant, *3:*15

Telescope making: adjustable, milk-crate equatorial mount, *5:*83; beanbag counterweight, *5:*87; giant binocular chair, *1:*86; hyperbolic astrograph, *6:*83; microwaving pitch lap, *5:*87; Ernie Piini's Sun-tracking mirror, *1:*88; plastic piping finder rings, *5:*86; simple filter rack, *5:*86; steel-ribbon-on-sector drive, *3:*81

Telescopes:

Amateur: Paul Lind's 8-inch coma-corrected reflector, *6:*83; David Moerke's 17½- and 12½-inch reflectors with split-Dob mounts, *4:*75; Porter Garden, *4:*75; Questar bankruptcy, *1:*10; Wayne Schmidt's chair-mounted 8-inch binoculars, *1:*86; tracking Earth-orbiting spacecraft, *2:*86

Professional: Automated Telescope Facility (7-inch), *6:*95; Baker-Nunn Schmidt cameras, *6:*100; Bradford Robotic (0.46-meter), *6:*92; Cambridge Optical Aperture Synthesis Telescope, *1:*16; Hooker (100-inch), *3:*14; Keck II (10-meter), *1:*13; Large Binocular Telescope, *4:*15; Remotely Operated (14-inch), *6:*95; Shane (3-meter), *2:*23

X-ray astronomy: high-velocity clouds in Milky Way, *5:*15; image of SN 1006 remnant, *3:*15

◀ THE EDMUND ASTROSCAN® 2001 WIDE FIELD TELESCOPE

• Spectacular Extra Wide 3° Field
• Newtonian Rich-Field Reflector

The Astroscan® Telescope is a 4 1/8" clear aperture Newtonian Rich-Field reflector that provides a breathtaking 3° of field that literally makes this instrument an open window on the universe. The heart of its total optical system is an exquisite primary mirror, ground, polished and tested in our own facility to perform to the theoretical limits possible for its size. Combined with a unique optical window, elliptical secondary mirror and 28mm RKE® eyepiece, it provides spectacular images over a wide field of view. SN#2001

THE EDMUND 3" F/6 REFLECTOR ▶

• Wide 1.6° Field Makes It Easy To Find Sky Objects
• 30X Magnification with 15mm RKE® Eyepiece

The F/6 Reflector is the ideal basic beginner telescope. Our goal in designing this scope was to build a durable, basic scope and mount around high-quality professional optics that guarantee excellent high-resolution viewing. The all-metal mount is extremely stable, and the high-impact, thick-wall ABS tube keeps thermal fluctuation to a minimum. The primary mirror has an anti-shock mount and is permanently collimated at our factory. SN#31308

GIFTS FOR COMET FANS AND SPACE ENTHUSIASTS

THE COMET HALE-BOPP BOOK

Guide to an Awe-Inspiring Visitor from Deep Space

Foreword by comet co-discoverer Thomas Bopp

Thomas Hockey

This book fills the long-standing demand for a comet guidebook for the curious 9th grader or 90-year old. Biographical details and quotes from Alan Hale and Thomas Bopp humanize the science behind the comet and capture the "feel" of what could well be this decade's astronomical event. The book provides charts and tables to locate and observe the comet. Hockey lucidly tells the story of the comet's discovery, astronomer's reaction to it, and their preparation for its arrival. He also covers other famous comets, such as Comet Halley, Comet Shoemaker-Levy 9 and Comet Hyakutake. Filled with photos and illustrations, this book is an invaluable resource for all comet enthusiasts. Internationally-renown, Dr. Hockey is a professional planetary observer and experienced science educator.

Selected "Main Feature" of all Newbridge Science Book-of-the-Month Clubs

1996, 176 pages, illustrated, 6 x 9
ISBN 1-882360-14-1 Cloth US $42.95
ISBN 1-882360-15-X Paper US $19.95
(outside US: $52.50 & $25.95, respectively)

THE CASE FOR SPACE

Who Benefits from Explorations of the Last Frontier?

Paul S. Hardersen

"...a rare and important book...it shows how space technology makes very personal contributions to the quality of life of people."
Scott Pace, Executive VP, National Space Society, Chairman, Policy Committee

"This book is long overdue...Read this book and then mail it to your congressman. Hardersen's is a message they need to hear on Capital Hill."
Dr. Robert Zubrin, Chairman, Executive Committee, National Space Society

"...a compelling, easy-to-read argument for space exploration...appealing to both the novice and the expert...when you finish the book, you have a clearer picture of the potential of space technology."
US Senator Chuck Grassley

"Hardersen...has made a difference in creating a spacefaring civilization."
Lori Garver, Executive Director, National Space Society

1996, ~200 pages, illustrated, 6 x 9
ISBN 1-882360-47-8, Cloth $42.95
ISBN 1-882360-48-6, Paper $19.95
(outside US: $52.50 & $25.95, respectively)
